FROM THE WILDERNESS - From The Wilderness (FTW) is a non-partisan newsletter (est. March 1998) focusing on covert operations, macro economics as financed by organized criminal operations (especially the drug trade) and the impact of these on global and domestic politics. FTW is read by more than 16,000 subscribers in 40 countries. These include 40 members of the US Congress, the intelligence committees of the House and Senate, professors and academics at 35 colleges and universities in the U.S. and Canada and researchers around the world.

BOOKS AND ESSAYS - Throughout the last half of the 20th Century, as multinational corporations and a progressively homogenized and sedated commercial media sought profits through conformity and merger/acquisitions, some of the greatest historical and research works of our time have disappeared from print. This has not been accidental. Some works have been suppressed and forced from print with the approval of intelligence agencies, politicians and interests whose stock might be impacted if truth were known. The hidden history has been denied to the world until recently when commercially available computer technology has made it economically feasible to resurrect these works and to make these treasures once again available to a world in need of a "good map." Because many of these authors have suffered and endured hardships to bring us their gifts, it is policy of FTW Publications that we will never make more money from any republication than the writer does. Except in cases where there are licensing or royalty fees for photographs or artwork, FTW and its selected author will share the proceeds of each sale on a 50-50 basis. If licensing fees occur they will also be split 50-50. That is the true meaning of partnership.

ABOUT MICHAEL C. RUPPERT (Publisher/Editor) - Mike is a Political Science, Honors Graduate of UCLA (1973) who comes from a Washington, D.C. family with roots in the intelligence community. Groomed to be a "leader," Ruppert attended college with friends who became "senior staffers" in the Reagan-Bush White House. A former LAPD narcotics investigator, Ruppert is most famous for his 1996 public confrontation of CIA Director John Deutch with evidence of CIA drug trafficking - live on world television. In addition to his duties at From The Wilderness, Mike travels the country lecturing at colleges and speaking to a wide variety of groups. He is a featured guest on talk radio six to eight times a month, all over the country.

WHY SUBSCRIBE? - From The Wilderness has been as much as a year ahead of the mainstream media on major stories. Now, as the world is undergoing one of the biggest changes in human history, we find that attitudes and positions we have been writing about for six years, like the dependence of the global economy and financial markets on laundered drug money, are finding their way into mainstream press reports and academic circles. The events since September 11, 2001 have shown that FTW has been ahead of the curve in predicting the current crisis. We offer our readers a unique and accurate map of how the world works, unfiltered by preconception or ideology. Since 9-11 we have quadrupled in size and our website traffic now exceeds 10,000 visitors a day. We also have a new section on the website with important stories which is exclusively for the use of our subscribers. Now you can join the major media, politicians and academics from around the world who come to us for perspective and information they can get no place else except From The Wilderness.

VIDEOS

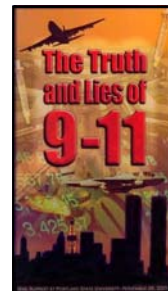

THE TRUTH AND LIES OF 9-11

DVD

DVD includes a NEW introduction by Mike Ruppert with updates and chapter selection. (146 mins.)

This is the video that has been quietly taking the country by storm. The most revealing expose' on 9-11 to date, this video is packed with documented, sourced, corroborated and confirmed evidence covering the spectrum from Government fore-knowledge to "who benefits," to the economic paper trail leading to the White House and beyond. Centering on the lecture Mike Ruppert gave at Portland State University on November 28th, 2001, the video also has guest appearances by Peter Dale Scott, Ph.D. (U.C. Berkeley); Former Assistant HUD Secretary Catherine Austin Fitts; John Metzger, Ph.D. (Michigan State University); The Hon. Cynthia McKinney (D), GA; The Hon. Ron Paul (R), TX; and the Hon. Barbara Lee (D), CA. Although the video is now two years old, much of the evidence has yet to be brought forward by the mainstream media. They have not even come close to asking the questions addressed in this video. *Professionally produced with music by Fritz Heede and edited by Hollywood master Jason Stelzel.*

HIDDEN WARS OF DESERT STORM

DVD

(60 mins.)

Acclaimed by the NY Times as an "uncommonly sober, well-researched film", "Hidden Wars of Desert Storm" investigates the origins of the Gulf War, explains the US Gov.'s specific motives in going to war in 1991 and exposes the mechanisms of war-profiteering that seem destined to shape US foreign policies time after time. The doc also covers the Pentagon's use of radioactive ammunitions in the Gulf and their impact on both the local populations and allied forces. Find out today why this incredible, award-winning documentary has been shown and acclaimed in well over 30 countries including all of Europe but has been forcefully shunned by all the US mainstream media. Featuring exclusive interviews of Norman Schwarzkopf, Ramsey Clark, Denis Haliday and Scott Ritter as well as unseen before war footage and documents. *By Gerard Ungerman & Audrey Brohy. Narrated by John Hurt.*

PLAN COLOMBIA

Cashing-In on the Drug War Failure

DVD

DVD includes English and Spanish versions. Behind-the-scenes interviews with Paul Wellstone, Noam Chomsky, Sanho Tree and much more! (60 mins.)

With most of the U.S. military aid under the so-called "Plan Colombia" anti-drug package delivered, Colombian President Andres Pastrana unilaterally withdraws from the peace process with the Revolutionary Armed Forces of Colombia (FARC) and steps up violence in this 50-year quasi-civil war. In the post 9-11 context and with the U.S. State Department now branding the leftist FARC a "terrorist organization" and openly targeting it, what is left of the initial anti-narcotics purpose of the U.S. "Plan Colombia"? Is the U.S. Government still concerned with fighting drugs? 20 years of drug wars in the Andes have resulted in a two-fold INCREASE in cocaine imported into the U.S. in the last ten years alone. Could there be alternate purposes to a plan focused on beefing up the Colombian military and spraying coca fields in rebel-held parts of the country when coca is grown in many parts of Colombia that are not being sprayed? This video sheds light on the complex issues of drug-trafficking and civil struggle in Colombia and the impact of both the current chemical-spray program carried out by the U.S. Defense-contractor Dynacorps and the multi-billion-dollar aid package delivered to the brutal Colombian military. Additional insights are provided on the significant factor oil has become in the Colombian equation, a country with the same oil potential as Venezuela, today the second largest oil supplier to the U.S. *By Gerard Ungerman & Audrey Brohy. Narrated by Ed Asner.*

WALL STREETS WAR FOR DRUG MONEY

VHS

Mike's first professional quality video is a live lecture for the USC School of International Relations (recorded 12/8/00). This is a quantum leap in FTW's information and understanding about how drug money permeates Wall Street and why a Colombian Vietnam seems both inevitable and necessary to stave off a huge economic crash. You'll be amazed at how deep the corruption goes in our government. This tape is also a perfect model for the new war to control opium production in Afghanistan and Central Asia.

THE PARTY'S OVER

Oil, War and the Fate of Industrial Societies

by Richard Heinberg

When Mike Bowlin, Chairman of ARCO, said in 1999 that "We've embarked on the beginning of the last days of the age of oil," he was voicing a truth that many others in the petroleum industry knew but dared not utter. Over the past few years, evidence has mounted that global oil production is nearing its historic peak. Oil has been the cheapest and most convenient energy resource ever discovered by humans. During the past two centuries, people in industrial nations accustomed themselves to a regime in which more fossil-fuel energy was available each year, and the global population grew quickly to take advantage of this energy windfall. Industrial nations also came to rely on an economic system built on the assumption that growth is normal and necessary, and that it can go on forever.

When oil production peaks, those assumptions will come crashing down. As we move from a historic interval of energy growth to one of energy decline, we are entering uncharted territory. It takes some effort to adjust one's mental frame of reference to this new reality.

RESOURCE WARS

The New Landscape of Global Conflict

by Michael T. Klare

International security expert Michael T. Klare argues that in the early decades of the new millennium, wars will be fought not over ideology but over access to dwindling supplies of precious natural commodities. The political divisions of the Cold War, Klare asserts, have given way to a global scramble for oil, natural gas, minerals, and water. And as armies throughout the world define resource security as a primary objective, widespread instability is bound to follow, especially in those areas where competition for essential materials overlaps with long-standing territorial and religious disputes. In this clarifying view, the recent explosive conflict between the United States and Islamic extremism stands revealed as the predictable consequence of consumer nations seeking to protect the vital resources they depend on.

THE END OF THE OIL AGE

by Dale Allen Pfeiffer

The End of the Oil Age is an anthology of science and geopolitical articles written by Dale Allen Pfeiffer. This collection contains all of the author's major articles about energy depletion, the confluence of environmental problems set to converge upon the world, and the implications for modern civilization. Understanding the global peak of oil production and the North American natural gas cliff is essential for making sense of what is happening in the world today. The book is a warning about the end of hydrocarbon based technological civilization.

GOLD WARS

The Battle Against Sound Money As Seen From A Swiss Perspective

by Ferdinand Lips

Gold Wars deals with gold's history, the gold rushes and the abandonment of gold-as-money under the modern welfare/warfare state. It shows how governments, fearing the affinity of free people for gold, fight it, thereby helping to destroy whole countries along with the gold mining industry. The book highlights the betrayal of gold-rich Switzerland. The author condemns gold "hedging," gold market manipulation by governments and bullion banks, fiat money and debt. He concludes that only a gold standard can return an ailing world economy to its full potential, reduce unemployment, help restore law and order, and help to secure peace and freedom for mankind. WAR IS A RACKET

by Brigadier General Smedley D. Butler

More than 70 years ago a Marine Colonel with amazing integrity named Smedley Butler saw through the corporate banking machines that ordered men to their deaths for the sake of profit and conquest. You will be hard pressed to find the words to express your feelings when you see that the tricks pulled in Central America in the 1920s and 30s are the same tricks being pulled today. Understanding at a fundamental level how things work is a prerequisite for changing them. Understanding how long they have worked will give you the measure of the amount of unlearning that is required to achieve a breakthrough. This is an incredible read because you feel as though the same things keep happening over and over again. They do!

THE GLOBALISATION OF POVERTY

And the New World Order

by Michel Chossudovsky

377 pages, soft-cover

\$19.95

In this new and expanded edition of Chossudovsky's international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalization of poverty. This book is a skilful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically. In this new enlarged edition - which includes ten new chapters and a new introduction--the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalization. Michel Chossudovsky is an international best-selling author. He is Professor of Economics at the University of Ottawa and Director of the Centre for Research on Globalisation which hosts the critically acclaimed website: www.globalresearch.ca.

FULL SPECTRUM DISORDER

The Military in the New American Century

by Stan Goff

243 pages, soft-cover

\$13.95

Goff's career as a soldier in Army Special Operations (Delta Force, Rangers, and Special Forces) took him from the invasions of Vietnam, Grenada, and Haiti, to the training grounds of the Colombian and Peruvian armed forces. He taught Military Science at the U.S. Military Academy at West Point, conducted classified missions in El Salvador and Guatemala, and was deployed with the ill-fated Task Force Ranger (of Black Hawk Down fame) to Mogadishu. There are snapshots of those experiences in this book. But this is not a typical soldier's memoir. Goff engages in neither machismo nor maudlin soul-searching, and he is not content to merely tell stories. He interprets his own experience through years of post-military searching since he left the military, and draws some starkly brutal conclusions about the risks we all face in the dangerous last days of an unstable empire.

As FTW has documented in previous stories, major deployments of U.S. and British forces had taken place before the attacks. And the U.S. Army and the CIA had been active in Uzbekistan for several years. There is now evidence that what the world is witnessing is a cold and calculated war plan - at least four years in the making - and that, from reading Brzezinski's own words about Pearl Harbor, the World Trade Center attacks were just the trigger needed to set the final conquest in motion.

POWER DOWN

Options and Actions for a Post-Carbon World

by Richard Heinberg

Resource depletion and population pressures are about to catch up with us and no one is prepared. Oil is running out and, if the U.S. continues with current policies, the next decades will be marked by war, economic collapse, and environmental catastrophe. There are alternatives. A "Powerdown" strategy, for example, would aim to reduce per-capita resource usage in wealthy countries, develop alternative energy sources, distribute resources more equitably, and reduce the human population humanely but systematically over time. It could save us, but will require tremendous effort and economic sacrifice. *Powerdown* speaks frankly to these dilemmas. Avoiding cynicism and despair, it begins with an overview of the likely impacts of oil and natural gas depletion and then outlines four options for industrial societies during the next decades. Finally, the book explores likely responses to these four options. Timely, accessible and eloquent, *Powerdown* is a clarion call to urgent action. Where will you be when oil runs out? And what are the possible scenarios for avoiding madness and mayhem?

BRINGING THE WAR HOME

by William Thomas

Drawing on his experiences as a reporter and environmental emergency response worker in the war-torn Persian Gulf - as well as US congressional and military records never before assembled in a single volume - William Thomas takes readers from nighttime missile attacks on American forces and frantic cries of "gas, gas, gas!" to the dazed survivors of Baghdad bombing raids and the wreckage-clogged Highway to Hell. This award winning journalist and former member of the US military lays bare a Pentagon cover-up intended to bury forever Washington's complicity in supplying the chemical and biological weaponry thrown into its soldiers faces. A succession of shocking disclosures leads us through a labyrinth of political expediency and military incompetence which saw American troops and support personnel inoculated with experimental vaccines - including a nerve agent pill that amplified the effects of the sarin nerve gas repeatedly detected in their positions. In a climactic courtroom-style drama, US Senator Donald Riegle confronts the head of the US Army's Chemical Warfare Department and demands the truth.

INSIDE THE SHADOW GOVERNMENT

National Emergencies and the Cult of Secrecy

by Harry Helms

A treasure that one might easily overlook. The first ten pages of the book, wherein Helms recounts and seems to accept in nauseating detail, the entire US government account of 9-11 almost made me toss this book out. I am so glad I didn't because what I found after that is a treasure trove of meticulous research, fully supported by actual documentation. His discussion of 9/11 was just a starting point. There is an entire secret establishment, already in place and operational, under a rubric called "continuity of government." This is the heart of the real and very scary truths behind FEMA, domestic prison camps, secret installations like Site R and mount Weather, martial law and a parallel government that operates without congressional supervision, through executive orders. It is the mechanism with which American civil liberties will finally be crushed out as Peak Oil, economic collapse and biowarfare become more prominent in our futures. I have dog-eared so many pages and made so many notes in the margins that Helms' book is now one of my indispensable desk references. At the same time that it debunks so many of the popular right-wing myths of the last decade, it adds well documented flesh to a beast that is just as scary, just as real, and very much a part of our daily lives. It is mandatory reading for those who want to know what the government has planned to do and how they will do it. - Mike Ruppert, Publisher/Editor, From The Wilderness.

AMERICA'S SECRET ESTABLISHMENT

An Introduction to the Order of Skull & Bones

by Antony C. Sutton

"Back in 1968 my *Western Technology* and *Soviet Economic Development* was published by the Hoover Institution at Stanford University. In three substantial volumes I detailed how the West had built the Soviet Union. However, the work generated a seemingly insoluble puzzle - why have we done this? Why did we build the Soviet Union, while we also transferred technology to Hitler's Germany? Why does Washington want to conceal these facts? Why have we boosted Soviet military power? And simultaneously boosted our own? In subsequent books, the *Wall Street* series, I added more questions - but no answers. Then a year or so ago I received an eight-inch batch of documents nothing less than the membership lists of an American secret society. The names spelled Power, with a capital P. The book you will read here is a combined version of a series reporting on this research. These volumes will explain why the West built the Soviets and Hitler; why we go to war, to lose; why Wall Street loves Marx ists and Nazis; why the kids can't read; why the Churches have become propaganda founts; why historical facts are suppressed, why politicians lie and a hundred other whys."

WHO'S WHO OF THE ELITE

Members of the Bilderbergs, CFR & Trilateral Commission

by Robert Gaylon Ross, Sr.

Last updated in 2002, this manual breaks down the membership in these elite groups that control both political parties, banking and finance, the three branches of the federal government, state and local governments, the major media, foreign governments and major corporations. Once you start looking through this book - and after you've picked your jaw up off the floor - you find yourself just turning through the pages in amazement. FTW has written extensively about CFR members and also members of the Trilateral Commission, co-founded by Zbigniew Brzezinski and David Rockefeller. From there it is but a short step up to the international arena of the Bilderberg Group where globalization goes from theory into practice behind high security, complete privacy and opulent surroundings. What do Bill Clinton, George Herbert Walker Bush, Colin Powell, George Soros, George Stephanopoulos and Tom Brokaw have in common? You'll find out when you get this book. ANGELS DON'T PLAY THIS HAARP

Advances in Tesla Technology

by Dr. Nick Begich and Jeane Manning

HAARP - (High-Frequency Active Auroral Research Project) A project run jointly by the US Air Force and Navy. Based in Alaska, it is a research program designed to study the ionosphere in order to develop new weapons technology. It could be used to wipe out communications over an extremely large area, it could be used as a tool for geophysical probing, which would define oil, gas and mineral deposits, it could be used to modify weather patterns and cause earthquakes. If HAARP was tuned to the right frequency, using just the right waveforms, mental disruption throughout a region could occur intentionally or as a side-effect of the radio frequency transmissions. It could also be used for crowd control by employing the cyclotron resonance of HAARP together with a minute amount of airborne chemical.

Co-author Jeane Manning is an experienced magazine journalist and reporter for daily newspapers. She has doggedly tracked HAARP since 1994. Co-author Dr. Nick Begich is the eldest son of the late US Congressman from Alaska, Nick Begich Sr., and political activist Pegge Begich. Dr. Begich is well known in Alaska for his political activities. Dr. Begich received his doctorate in traditional medicine from The Open International University For Complimentary Medicines in November 1994.

THE ASSASSINATIONS

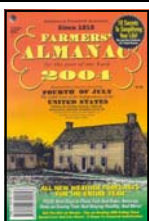

Probe Magazine on JFK, MLK, RFK and Malcolm X

edited by James DiEugenio and Lisa Pease

When informed by the movie JFK that thousands of documents about the president's murder remain sealed, a distressed American public motivated Congress to create the Assassinations Records Review Board, which declassified and released many - but not all - previously withheld files. A journal named Probe was created in 1992 to report on and consider this cascade of new material, as well as continuing disinformation, regarding the assassinations of President Kennedy, Martin Luther King, Robert Kennedy and Malcolm X.

Coinciding with the 40th anniversary of JFK's death, The Assassinations presents some of Probe's most fascinating articles, in addition to material written after the well-regarded journal ceased publication.

ALBERT V. CARONE

The Missing Link Between CIA and the Mob

His daughter knew Mafia Dons Santos Trafficante as Uncle Sonny and Sam Giancana as Uncle Momo. While he was a "son of the heart" to Vito Genovese, William Casey attended his grandson's christening. This was Ollie North's and George Bush's bagman. Photos, passport, bank records and more. You want proof? You can't handle the proof! (56 pages)

THE TYREE PAPERS

Watchtower, Green Berets & Drugs

Not even A&E, whose Bill Curtis aired a 1998 documentary, Murder at Ft. Devens, has all of this material which includes affidavits, military records, CIA documents and censored Army reports proving that an innocent man was framed for murder. You will not understand CIA drug dealing until you understand how the CIA has used the Green Berets. This is the foundation of suits against Geo. Bush, the CIA and the Army. Exclusively available through From the Wilderness with the approval of Tyree's attorney. (163 pages with exhibits)
